Hi Chris.

It is about a 1-2 1/2 turnaround now.

Do you by chance have a copy of the US Ecology approved profiles for the material that we would transport to US Ecology?

Thank you.

As discussed in our phone conversation last week, I would like to schedule a shipment for the week of July 16-20, 2018, for waste streams below. Please let me know if the mentioned dates align with your "milk-run" schedule.
>
> - 2 barrels of Metal/Hexavalent Chromium Waste (each barrel = **40 lbs**): shipping to US Ecology in Beatty, NV

- Cadmium Column Waste (quantity 4x columns in a 1 gallon container **<1 lbs**): shipping to US Ecology in Beatty, NV

- 2 barrels of Cadmium Waste (barrel #1 = **42 lbs**, barrel #2 = **36 lbs**): shipping to US Ecology in Beatty, NV

- 1 barrel of COD Waste (**24 lbs**): shipping to Veolia (Profile 274506)

- 5 gallon bucket of Elemental Mercury **(30 lbs**): shipping to Veolia (attached profile pending approval)

I will have two separate shipping manifest ready upon your arrival for each designated disposal facility.

Thanks again for assisting with this shipment and we will talk soon!

Regards,

Chris Genuardi

Hello - I believe the code is used for unused elemental mercury when it is a product. Yes when we take ownership of the material we remove the waste codes.

I believe the U151 code is applied to a discarded elemental mercury product, off-specification product, or a container with mercury spill residue. I would like to know your thoughts.

Hi Chris -

I am the Western Regional Account Manager that works with both Yvette and Shannon. I can answer any profile and pricing questions. You can use this profile form you have attached here for the pail containing the various sizes of elemental mercury. Please list those on page 2 in number 7. You can send that to Yvette along with the pick up request form that I have attached. The current pricing we have with Colorado Springs Utilities is good through Feb 2019 and is $30 per pound for the elemental mercury, plus transportation and the Energy & Security Surcharge. Please let me know what other questions you have. Thank you!

Hi.

Chris had some questions on analysis for Elemental Mercury below.

I think the msds would help but wanted to ask you first.

Thank you.

As a kindly reminder please note:

An EPA ID is required for manifests and/or hazardous waste.

For any PCB material requires a PCB Continuation sheet that needs to identify

an Out of Service date *and* Serial number or Unique ID number

(that you can create or provide if one is not on the container(s))

For all Mercury Labpacks and debris -please send the information of what is in the containers as profiles are expiring for these types of waste.

>
> I wanted to reach out to you because one of our facilities is in need of disposing elemental mercury in the quantities and containers listed below. Does Veolia provide a lab pack waste profile template I can utilize to begin the process, or is there another option available? I would like to have the profile complete and sent to you for approval by the middle of next week. In addition, we would like to ship the waste within the next few weeks. Any assistance you can provide would be greatly appreciated and I look forward to hearing from you!

1 poly bottle has a glass vial with about 10 mls of Hg

1 poly bottle has a glass vial with about 20 mls of Hg

1 poly bottle has about 2289.1 gm of Hg (~ 5 lbs)

1 glass bottle has about 30 lbs of Hg

Thank you,

Chris Genuardi
